

## 4 Reasons Why You Should Vote For the Protection of Human Embryos (SB 169):

### #1. Adult Stem Cell Research is the ONLY Successful Stem Cell Research.

Adult Stem Cell Research has had 73 successful treatments of diseases.

Embryonic Stem Cell Research has had no successful treatments of diseases.

### #2. Embryonic Stem Cell Research Kills Human Embryos.

The intentional killing of Human Embryos can never be justified for the purpose of perceived medical discoveries.

We must always choose ethical standards over political expediency.

### #3. Public Opinion is in Favor of Protecting Human Life.

62% of those polled in 2008 said that they agreed that an embryo is a developing human life, and therefore it should not be destroyed for scientific or research purposes.

### #4. Protecting Human Embryos does NOT Prohibit the Treatment of Women for Infertility!

There has already been a bill in Louisiana for 23 years that has established all in vitro embryos as "juridical persons". There has been NO legal challenge to it and the IVF industry has flourished.

**Something to Think About.....** *"I think that there are other tissues that we have demonstrated in the last few years that if we will aggressively pursue the science in those areas I think we can absolutely do more to find a cure as rapidly through those methods as we can sacrificing Human Embryos for the sake of science. I am totally opposed!"* -Governor Sonny Perdue
